

A.W.A.R.E. Student Services

2024-2025

School personnel at AWARE campuses utilized referral pathways to identify students in need of Tier 2 or Tier 3 mental health interventions. After a referral to an AWARE provider, most students received school-based, individual or group counseling services targeting their mental or behavioral health needs. During the 2024-2025 school year, 322 students received services through AWARE.

96% Students received services after AWARE referral

Caregiver Survey

93%

Were satisfied with support their child received.

93%

Would recommend their provider to other families.

100%

Valued their child's time spent with their provider.

Among caregivers who indicated their child was experiencing challenges in areas listed below, most reported improvements after receiving AWARE services.

100%

Improved relationships with teachers and staff

AWARE Referral Reasons for K-12 Students

Youth Survey of Secondary AWARE Students

100%

Were satisfied with the services they received.

>98%

Felt that the services helped them.

Agreed they were better at handling daily life because of these services.

Said that their provider treated them with respect.

[My provider] is a good listener and she doesn't judge

Very supportive and empathetic. I liked that [my provider] took the time to hear everything and asked questions to understand my experiences

[AWARE] helped me get better at handling my anger and gave me ways to control my anger

Teacher/Staff Survey

85%

of teachers surveyed are aware of procedures for referring a student for mental health support

Our counselors are great with the kids. Kids can always access help when they need it. Since the beginning of the year, there have been many students who have learned how to manage their emotions better through their work with our counselors.

Having [an AWARE counselor] on campus has been a huge support. She's approachable and genuinely invested in both students and staff. It's been helpful to have someone who not only supports students directly but also helps staff figure out how to address mental health needs in the classroom. That collaboration has made a real difference.

If I refer a student to the counselor, I am confident that the student's needs will be addressed in a timely manner.

The School Health Assessment and Performance Evaluation (SHAPE) system is used to evaluate strengths and areas of improvement for school mental health efforts. AWARE districts notably improved in "Funding & Stability" and "District Implementation Support".
